10 per cent. on booking order. Balance on Delivery
CUSTOM HATCHING :-

\$5.00 per 100. Cash on delivery of Eggs.

Orders booked in rotation. Orders are now coming in and if you wish to get early chicks, you would be well advised to place your order as soon as possible.

W. E. Spivey, Box 14, Crossfield, Alta.

Calgary Chinese Hi-Y Team Defeat Locals

Through the generosity of George and Fong, of the Oliver Cafe. The Chinese boys hockey team of the Hi Y club, Calgary were brought to Crossfield to play the local juniors. The city team showed superior training and combination which won them a victory of a 4-0 score at the call of time. The Calgary boys opened up with a counter in the first period when Joe Kheong put the finishing touches on a fine piece of combination work. The Crossfield boys found their feet in second period and held the score at 1-0. In the third period Harry Kheong scored on a short pass. Clayton Lem followed with a goal from a solo rush, and Harry Kheong repeated the performance as the game closed.

Hughie McFadyen was the pick of the Crossfield team and George Whitfield played an excellent game in goal.

Harry Kheong, Joe Kheong and Bill Dayton starred for Calgary.

Crossfield—Goal, Geo. Whitfield; defence, Bill McLeod Percy Jackson; forwards, Hugh McFadyen, Stanley Pogue, Fred Collin.

Calgary—Goal, Charlie Sing; defence, Clayton Lem, Harry Kheong; forwards, Joe Kheong, Bill Dayton, Charlie Ho Lem; subs, Paul De Foo, Jack Ho Lem.

Eats were provided both teams by the proprietors of the Oliver Cafe free of charge. Thanks to our local hockey enthusiasts.

Airdrie Hockey Team Here Saturday Night

The local senior hockey team journeyed to Airdrie on Wednesday night to play that team in a friendly game. The game was fast from start to finish and the spectator got full value for their money. The score of 10 to 4 for Airdrie does not indicate the play.

The Airdrie team had two players from Calgary which strengthened the Airdrie aggregation 100 percent. Crossfield "Home Brews" won't take second from any team on the line.

The Airdrie team are expected to play here on Saturday evening. If they play their home team no doubt a loss will be marked up against them.

Hockey

The Airdrie junior hockey team journeyed to Crossfield on Tuesday evening by truck to cross sticks with the locals. The game was evenly contested, and at the end of the third period the score was one all. An extra period was played but neither team scored.

High River Curlers Coming Saturday to Play Locals

Two curling rinks from High River are coming to Crossfield on Saturday to play the locals friendly games.

Mrs. F. Ruddy was a caller at The Chronicle office Thursday.

F. T. Baker, of the Crossfield garage, returned from Calgary on Thursday with a new Chevrolet truck. He is the local dealer for the Chevrolet cars and trucks.

Too Much ACID

Many people, two hours after eating, suffer indigestion they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Phillips' Milk of Magnesia. It has remained for 60 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acids, and at once. The symptoms disappear in five minutes.

You will never use crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 60 years in correcting excess acids. Each bottle contains full directions—any druggist.

This Changing World

Annual stock-taking is a wise procedure on the part of every individual and nation; it is absolutely essential in the case of the man in business if he is to make a success of the enterprise in which he is engaged. This is true whether the man be the manager of a large industrial concern, or the owner of a small country store. It also applies to the man who is engaged in the business of farming because to succeed he must know where he made money and where he lost it; he must find the leakages before he can plug up the holes.

Any such stock-taking should include a study of the trend of business throughout the country and the world to the extent that such study is possible. Especially in view of the close commercial relations existing between them, and the fact that they do a larger business with each other than with any other country, the people of Canada and the United States should understand not only what is taking place in their own country, but also in the neighboring country. For these reasons recent analysis of United States business in 1928 as compared with 1927 are of value to Canada.

These comparative studies reveal some startling developments and trends in business. For example, soft coal output decreased 6.1 per cent, and petroleum production 0.9 per cent, while the output of electricity increased 9.2 per cent, thus indicating the rapidity with which electric power is overtaking steam power. Railway carloadings dropped 0.6 per cent, and gross railway income by millions of dollars, but freight movement by motor trucks progressed over a larger mileage, and mail and express movements were heavier, while the output of automobiles increased 24 per cent, thus showing the modern trend to more rapid transportation of commodities.

Department store sales increased 1.1 per cent, mail order sales jumped 14.9 per cent, and chain store sales 37.1 per cent. On the other hand, wholesale trade fell off 1.5 per cent, indicating steady progression in more direct selling from producer to ultimate consumer. Possibly one of the effects of this development is found in the increase of 1.2 per cent in the number of business failures, notwithstanding the year was one of great production, a large constructive development and prosperity.

The modern trend in the larger use of electricity, more and still more and efficient machinery, and more direct and rapid transportation is emphasized by the fact that, in a year of amazing growth in production and construction, employment decreased 3.3 per cent. In contrast with this is the fact that union wage rates were 0.4 per cent. higher, indicating that, while there was decreased employment, those in employment were paid slightly higher wages.

The buying power of United States farmers rose 6 per cent, revealing an improvement in the agricultural situation. Business profits rose 11 per cent, savings bank deposits 8.9 per cent, life insurance sales 5 per cent.

The above figures would seem to indicate certain factors and lessons deserving of careful consideration by all business men. The fact that business profits rose 11 per cent, but business failures increased indicates that the business man who keeps himself informed of, and adjusts his operations in conformity with, changing conditions succeeds while the uninformed and ultra-conservative loses out. To the artisan, clerk and working man the figures seem to say that in this machinery age the man with knowledge and initiative, in a word, the efficient man, is in demand and at even higher wages, while the inefficient finds increasing difficulty in securing work.

The same economic forces are at work in Canada as in the United States, and the same tendencies are to be noted, the only difference being that this country is not so highly industrialized and has much greater natural resources still in an undeveloped state calling for manual labor. In the commercial world, especially in the retail merchant class, the problem of the mail order house, the chain store, the consolidation of merchandising in the hands of great concerns, and the allied problems of transportation and distribution, are becoming quite as acute, and if he is not to go under the small dealer must meet these changing conditions. He cannot do it alone, single-handed, but his chances of success are good through co-operation.

In the past few years, and particularly in 1928, a great change has taken place on our western Canada farms through the introduction of the combine, the motor truck, and the building of good roads. Through these means production will be increased on the one hand, while less human labor will be required on the other. There is the same tendency in agriculture as in manufacturing industry. This means that, large as western farms are on the average compared with other countries, they will, as operating units, become larger, with all the changes involved. Here, too, the further application of co-operative principles and methods will make for success.

Guard Against FLU Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious ailment may develop.

A simple treatment is to gargle the throat three times daily with Nerville. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "Flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste materials. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

Recipes For This Week

(By Betty Barclay)

BAKED ORANGE CUSTARD

- 3 egg yolks
- 1 egg white
- ½ cup sugar
- Few grains salt
- Grated rind 1 orange
- ¼ cup orange juice
- 1¼ cups milk

Beat yolks and white of eggs until light; add sugar, salt, grated orange rind and orange juice. Scald milk in double boiler; pour gradually, while stirring constantly, over egg mixture; pour into buttered custard cups, placed in a pan of hot water, and bake in a moderate oven until custard becomes firm. Cool, and serve with whipped cream on top, or turn out and surround with sections of orange and orange syrup.

THOUSAND ISLAND DRESSING

- 1 cup mayonnaise
- 2 hard-cooked eggs
- 2 tablespoons tomato catsup
- 2 tablespoons pimento stuffed olives
- 2 tablespoons chili sauce
- 2 tablespoons pickled onions.

To the mayonnaise add all of the other ingredients finely chopped.

Fertilizers From Trail, B. C.

Further experiments with super-phosphates from the smelter at Trail, B. C., will be conducted in 1929 by the Alberta Department of Agriculture in conjunction with the Dominion experimental farms and C.P.R. experimental farms. An abundant quantity of this fertilizer will be available to meet demands.

NEW HEALTH FOR TIRED-OUT WOMEN

Found in the Rich, Red Blood Dr. Williams' Pink Pills Actually Make.

Anemia comes on gradually, beginning with lassitude, indisposition to mental or bodily exertion, irritability and a feeling of fatigue. Later comes the paleness of the heart, headaches, frequent backaches and often disturbed digestion and an inability to obtain rest at night. Cases of this kind, if neglected, become more serious, but if taken in time there is no need to worry. Dr. Williams' Pink Pills, which are free from any harmful or habit-forming drug, are just the tonic needed to remedy this wretched state of health. These pills actually make the rich, red blood that stimulates and strengthens every organ and nerve in the body. Thus strength and activity return, the appetite improves and restful sleep is had. What Dr. Williams' Pink Pills can and will do is shown by the case of Mrs. D. B. Fanning, Seal Harbor, N.S., who says: "I was in a badly run-down condition. I was pale, my appetite was very poor and the least exertion would leave me tired and sore. In fact I was hardly able to do much work about the house. I decided to try Dr. Williams' Pink Pills and after taking a few boxes can truthfully say I had gained greatly in health and strength and was able to go about my work with no sign of the former weakness. I cheerfully recommend them to all others who may be in a run-down condition. You can get the pills from your druggist, or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Galahad had his good points, but only our higher civilization could produce a drug clerk who says "Thank you" after selling a postage stamp.

Complete in itself, Mother Graves' Worm Expeller does not require the assistance of any other medicine to make it effective. It does not fail to do its work.

Rover's Punishment

Nurse (suspiciously): "What have you been doing, Miss Ellen?"

Ellen: "Rover's eaten my dolly's slippers, so I've just been punishing him."

"How?"

"I've been to his kennel and drank his milk."

Ranching Days Recalled

The memory of ranching days in Alberta is preserved by the place names, Staveland, De Winton, Coccarne, and Stimosa.

Minard's Liniment for the Grippe and Flu.

W. N. U. 3770

ASPIRIN

Headaches may be swiftly and safely relieved by an Aspirin tablet. A most efficient remedy, and there's no after effect; its use avoids much needless suffering. Try it next time; see how soon its soothing influence is felt. Just as helpful when you have a cold; neuralgia, neuritis, rheumatism, lumbago. Just be certain you get real Aspirin—the genuine has Bayer on the box, and on every tablet. All druggists, with proven directions.

Physicians prescribe Aspirin; it does NOT affect the heart

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations, the Tablets will be stamped with their "Bayer Cross" trademark.

Farm Machinery Purchases

Farmers of Southern Alberta Made Heavy Investments Last Year

According to an estimate appearing in "The Lethbridge Herald," some \$7,250,000 was spent in Southern Alberta during 1928 for new autos, trucks, tractors, combines and other such farm machinery. The classification is as follows: Automobiles and trucks, \$2,500,000; Combines, \$1,000,000; tractors, \$1,250,000, and other machinery, \$2,500,000. At harvest time a survey showed there were 551 combines and 2,250 trucks in operation on the Lethbridge railway division.

"Dad, what is influence?" "Influence, my boy, is what you think you have till you try to use it."

Paring a corn is both risky and ineffective. It is much better to use Holloway's Corn Remover and eradicate them entirely.

A woman graduate of Glasgow University has become Scotland's first woman minister.

Alberta Wool

Over Fifty-seven Thousand Dollars Realized by Sheep Association.

Cheques to the value of \$57,898.57 have been sent out to members of the Alberta Sheep Breeders' association for wool shipped out and ranging in price from 24 to 38 cents a pound. The wool was shipped to the Canadian Co-operative Wool Growers, Toronto, where it was graded under government inspection.

Mothers Value this Oil.—Mothers who know how suddenly grown may seize their children and how necessary prompt action is in applying relief always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

"All men are born free and equal." "Yes, but some get married."

Use Minard's Liniment for the Flu.

Most men who go to court don't get to justice, but to get even.

Don't Let Foods Stale

Foods that ordinarily stale quickly will stay fresh and tempting a surprisingly long time if you cover them with Para-Sani Heavy Waxed Paper.

Your grocer, druggist or stationer has Para-Sani in the handy, sanitary knife-edged carton. For those who prefer a lighter paper put up in sheet form ask for Appleford's "Centre Pull" Packs.

Fairs Association Holds Successful Meeting

V. E. Foster of Camrose was returned as president of the Alberta Fairs Association for the fourth year, while Harold Huxley of Lloydminster enters on his eight term as secretary treasurer following the unanimous decision of the 1929 convention held this week in Calgary.

John Wilson of Innisfail was chosen to succeed Hugh McIntosh of Macleod as vice-president and the following directors were elected: E. W. Bjorkeland, Red Deer; J. F. Anderson, Lethbridge; Mrs. M. Mellis, Rimbey; W. E. Sutton, Vermilion; Chas. Ball, Sedgewick; E. L. Richardson, Calgary and G. R. Stewart, Lamont. It was decided that the 1930 annual convention of the association will be held in Edmonton.

Telephone Department Plans Big Expenditure

Expansion of the plant, equipment and activities of the Alberta Government Telephones will involve an expenditure of approximately \$1,000,000 before 1933, it is announced by Hon. V. W. Smith, Minister of Railways and Telephones. Included in the proposed improvements is a new exchange building in Calgary and the construction of new buildings at Hanna, Halkirk, Grand Prairie, St. Paul de Metis and possibly one other point in the province. A new building is also planned at Drumheller with a complete automatic exchange and it is expected that automatic equipment will also be installed in the Red Deer building.

EMBARGO BRINGS PROTEST FROM RAILWAY HEADS

Montreal.—The partial embargo placed against central European colonists by the Dominion department of immigration and colonization drew from the Canadian Pacific and Canadian National railways today a formal protest.

The decision, it was claimed in a statement issued by the presidents of the companies, will not only work distinct hardship on both transportation systems but will destroy the faith the governments, whose people are affected, have in Canada.

The companies deny they are interested in moving colonists from non-preferred countries in Europe rather than those from Great Britain or other northern European or preferred countries.

The attitude of the transportation companies was outlined in a statement issued to The Canadian Press by the railway presidents, E. W. Beatty and Sir Henry Thornton.

Will Urge Negotiation Of Trade Agreement

Chinese Nationalist League Would Develop Business With Canada

Vancouver.—Development of trade between China and Canada through the negotiation of a treaty between their government and that of Canada is a major recommendation to be voiced at the annual convention of Kuomintang, Chinese national government at Nanking, by the seven delegates from Canada. Seventy-five representatives of all branches of the Chinese National League in Canada are now holding their annual convocation at Canadian headquarters, Gore avenue and Pender street, and will elect their representatives before the sessions end Jan. 31.

An increase in the number of consuls throughout the Dominion will also be sought by the delegates from Canada. Consulates are at present maintained only at Ottawa and Vancouver.

There are 75 branches of the league in Canada, with three divisions, governing the east, midwestern and west. There is a Canadian membership of more than 10,000.

New Railway Station

C. N. R. Station At The Pas Is Officially Opened

The Pas.—Another chapter in the development of northern Manitoba was written today when the Canadian National Railway's new \$75,000 station was officially opened here.

A ceremony was held at the new station, which is situated in the heart of the town. Maj. J. G. MacLachlan, district engineer of the C. N. R., turned the station key over to V. I. Smart, general superintendent of transportation, who opened the door of the station to the public.

New Senator Appointed

Ottawa.—Hance J. Logan, former Liberal member for Cumberland, N. S., in the House of Commons, has been appointed to the Senate, filling the vacancy in that body caused by the death of Senator W. B. Ross. Announcement of the appointment was made at the prime minister's office.

Canada's Record Wheat Yield

Ottawa.—Canada's yield of wheat for the year 1928 amounted to 533,571,700 bushels. This is the highest on record and the first time that Canada has harvested a crop of over half a billion bushels. This announcement was made in the crop report just issued by the Dominion bureau of statistics.

Director of Cattle Association Brantford, Ont.—R. B. Falt, for 25 years editor of the Farm Journal, has been appointed director of extension of the Holstein-Friesian association of Canada. His headquarters will be in Brantford.

W. N. U. 1770

Class B Fairs

New Dates Are Set At Meeting Held In Winnipeg

Winnipeg.—The establishment of an eastern and a western circuit of B class fairs, and the setting of dates for fairs in each circuit, was the principal result of a session of the Western Canadian Fairs association held at the Fort Garry hotel.

The Western Canada Association of Exhibitions, which comprises the class A fairs concluded their convention in the afternoon.

Archie Wilson of Saskatoon, heads the Western Canada Association of Exhibitions for the coming year, being elected president to succeed H. W. Abbott of Edmonton at the closing session. H. G. Smith, Regina, was re-elected vice president of the organization and S. W. Jones, Saskatoon, will continue in office as secretary-treasurer.

Johnny J. Jones was awarded the contract for midway shows at class A fairs.

Because the circuit of the Western Canada Fairs Association had become so unwieldy by reason of the large number of fairs, it was divided into two circuits, and the dates for fairs set as follows:

Eastern circuit—Carman, June 28 to July 1; Estevan, July 3 to 6; Portage la Prairie, July 8 to 10; Dauphin, July 11 to 13; Prince Albert, July 15 to 17; Melfort, July 18 to 20; Yorkton, July 22 to 27.

Western circuit—Weyburn, July 8 to 10; Assiniboia, July 11 to 13; Lethbridge, July 15 to 17; Red Deer, July 22 to 24; Camrose, July 25 to 27; Vegreville, July 29 to 31; Vermilion, Aug. 1 to 3; Lloydminster, Aug. 5 to 7; North Battleford, Aug. 8 to 10.

Prizes For Research

Two Will Be Given For Best Work In Cancer Investigation

London.—The grand council of the British Empire cancer campaign announced approval of an offer of two prizes of \$2,500 each, in 1931 and 1932, for the best original piece of work in the investigation of cancer carried out in the British Empire. They will be known as the Garton prizes.

The report of the Medical Research Council, summarizing the work of various research centers in the early stages of cancer, can be removed by the radium treatment as efficaciously as by any surgical means.

King's Condition Improves

London.—Continued improvement in the health of the King today led the court officials to begin planning the regular levees and other functions of the season. The first levee, at which the Prince of Wales will preside, will be held at St. James palace on Feb. 26. The King's physicians have made it known that he must spend no more winters in England, and that he must seek a warmer climate for several months each year.

Believes Soviet Rule Over

Montreal.—The Soviet experiment in Russia had failed tragically and its end was now but a question of the patience of the Russian people, according to his imperial highness the Grand Duke Alexander Michailovitch, brother-in-law of the late czar, cousin by marriage to King George, who has arrived here. The grand duke was certain that his countrymen would not suffer the yoke of the communists very much longer.

To Tour Europe

Ottawa.—Arrangements have been concluded here for the European tour of a large party of Canadian club members. The group which is expected will draw members from every part of the Dominion, is to sail from Montreal aboard the liner Laurentic June 8.

Is Acting Postmaster

Ottawa.—William H. Penneck, for several years assistant postmaster at Ottawa, has been named acting postmaster. The vacancy was created by the death recently of Andrew G. Acres.

RECEIVES IMPORTANT POST

Dr. Charles R. Best, collaborator with Dr. F. G. Banting in the discovery of insulin, has been appointed to the chair of physiology of the University of Toronto. He succeeds Prof. J. J. R. MacLeod, who left Toronto to return to the University of Aberdeen.

Exhibition May

Be Re-Established

Winnipeg Ratepayers Will Vote On Question In March

Winnipeg.—An exhibition which the promoters hope will take a prominent place among the exhibitions of the Dominion is being planned at Winnipeg, according to Wesley McCarry, director, speaking to western exhibition authorities meeting here yesterday.

Winnipeg ratepayers will vote March 15 upon the question of whether or not they wish to authorize expenditure of \$850,000 for the re-establishment of the city's exhibition.

Will Take King To Sussex

London.—Preparations are going forward for the removal of King George to Bognor in Sussex as soon as his doctors decide that the time is opportune. The King will travel the 65 miles to the coast resort in a large car fitted so that he can lie comfortably as in his bed at Buckingham palace.

Wrote For "Punch"

London.—Rudolph Chambers Ledermann is dead at Bourne End after a long illness. He was famous as an oarsman and rowing coach and also for the light, witty verses which he contributed to "Punch."

Needs Britain's Protection

Iraq Is Not Sufficiently Protected To Defend Itself

London.—Differences between the British and Iraq governments over the ability or otherwise of Iraq to defend itself have resulted in the resignation of the Iraq cabinet under Premier Aska Jafar Pasha of Askeri.

The British authorities hold the view that Iraq, placed under Britain's protection after the war, is not yet ready to assume full responsibility for its defence.

A treaty between the British and Iraq governments in 1923 provides the responsibilities of Great Britain as a mandatory power shall be terminated when Iraq is admitted to the League of Nations.

Iraq has a population of nearly 5,000,000, practically all Mohammedans. Its chief city is Bagdad, and the territory is east of Arabia, comprising 150,000 square miles.

The real difficulty it is pointed out in London is that even the existing agreements between Great Britain and Iraq are not fulfilled particularly with regard to military and financial matters, including railways and forts.

Crosses Atlantic In

Steamer's Lifboat

Stowaway From England Had Feet Frost-Bitten During Voyage

New York.—Matthew Baddley, youthful cheese cart driver of Cheshire county, England, completed a stormy crossing of the Atlantic in a lifboat, an uncomfortable but not a dangerous journey, for the lifboat all the time was hanging in its davits on the liner Lancastrian. For 10 days the stowaway stuck it out through storm and cold, living on the emergency rations in his hiding place. He kept his hands warm against his body but his feet were frost-bitten and just before the ship reached quarantine the pain drove him forth.

He collapsed while telling his story but was revived and put to bed in the ship's hospital. He will be sent back to his cheese cart.

Treating Drug Addicts

Geneva.—Nontake Sato, the Japanese League of Nations representative, has informed the international opium committee that Japan was successfully applying medical treatment to Korean morphine addicts. Out of 684 cases, 660 had been sent to hospitals and cured.

URGES BETTER FEELING BETWEEN TWO NATIONS

New York.—J. Ramsay MacDonald, former premier of Great Britain, in an article under his name in the current issue of The Nation, Liberal weekly, makes a plea for the understanding public men of the two nations "to meet and drag from the obscure corners of sulky suspicion the things that make difficulties between us."

The relations between the United States and Great Britain grow increasingly unhappy," he says. "A spirit is growing in the two countries which is estranging them and is encouraging a kind of squabbling criticism which destroys mutual understanding and forbearance."

"Have both of us failed to observe how easy it is to slip into war fever, how ready popular imagination is to be set on fire by anyone—even an almost anonymous newspaper proprietor—who cares to light a match?" he asks, then continues:

"There is no case for private unofficial action and conferences. The governments must act. Both countries ought to appoint five or six outstanding men to discuss our differences. Mayhap fair air would clear our minds of them."

South African Tourists

Greeted By Snowstorm

Students Wanted Thirties and Got It In Toronto

Toronto.—In the midst of a blinding snowstorm 37 students of South African universities arrived here in the course of their tour of United States and Canada.

"Just what we wanted," one of them exclaimed heartily, though citizens of Toronto were finding the storm troublesome.

"We were counting on Canada for the thrill of real cold weather, lots of snow and the novelty of ice hockey," T. Thorpe, Capetown university spokesman for the visitors said.

The students were the guests of Toronto university and left for Montreal for a visit to McGill university. Before completion of the tour the students will have been away from home for three months and will have travelled 25,000 miles.

Ratifies Kellogg Treaty

Action of Lithuania May Affect Dispute Between Russia and Poland

Kovno, Lithuania.—The Lithuanian government ratified the anti-war Kellogg pact.

Ratification of the Kellogg pact by Lithuania has significance in its bearing upon negotiations between Russia and Poland for a special protocol applying the pact in a localized sense to the states that touch the western frontier of Russia. Poland and Lithuania have been at odds over frontier questions and over the ownership of Vilna, a city which Lithuania claims as its legitimate capital but which is now held by Poland.

Decline in Dairy Production

Winnipeg.—High spring feed prices and tempting offers by American buyers for dairy cows caused a falling off in total dairy production for 1928 in Manitoba, according to Alex. McKay, president of the butter manufacturer's section of the Manitoba Dairy association. The year, on the whole, was successful, the president intimated in his address.

Wireless For Planes

Toronto.—Provincial air force planes will be equipped this year with wireless, so they may send reports to headquarters from any distance up to 400 miles it has been announced.

Report Severed Relations

Berlin.—An entirely unconfirmed report circulated in Berlin said Japan had severed diplomatic relations with Russia. The source of the report was not known.

BACK FROM THE BARRENS

Although he had not been out of the Barren lands for fifteen years, George Yandle, trapper, maintained a fine sense of civilization. The first thing he did when he got to The Pas—he did not even wait until he reached Winnipeg—was buy himself a pair of spats with zippers. Yandle acted as interpreter when Count Ilya Tolstoy entertained the Eskimos in the far north. The photograph, which was taken outside the Canadian National Railway station in Winnipeg, just after the trio's arrival, shows Yandle; Tolstoy, in the center; and W. J. Casel, photographer. Count Tolstoy, who is the grandson of the great Russian writer and philanthropist, headed an expedition into the Barrens to study the migration habits of the caribou, and secure unusual photographs were obtained of the immense herds. After spending a day in Winnipeg, the party, together with five Eskimo dogs, worth \$65 apiece, went to Timagami, the Ontario forest reserve, for further study of wild animals, and thence to New York.

Preparing New Calendar For Each Year Requires Six Years Of Co-Operative Effort

A letter pointing out the unnecessary inconvenience caused by the position of Christmas and New Year's day in the calendar of 1928, and giving an illuminating sketch of the intricate systems of calendar making that are undertaken each year, has been received by the editor of "Interdependence," the monthly review of the League of Nations Society in Canada, which has its headquarters at Ottawa, from Moses B. Cotsworth, well known calendar expert and director of the International Fixed Calendar League.

Mr. Cotsworth is the exponent of a fixed calendar of thirteen months of twenty-eight days each to replace the irregular Gregorian calendar now in use and points out that because Christmas fell upon a Tuesday in 1928 much inconvenience was caused to employers and employees as the majority had to return to work following the week-end, on Monday, thus interrupting the holiday and making it impossible for people to visit their friends or relatives at distant points. Under the International Fixed Calendar which is suggested as an efficient alternative to that now in vogue, Mr. Cotsworth points out that Christmas would always fall upon a Monday, as would all other holidays throughout the year, creating a long week-end holiday to the benefit of the world at large.

Dealing with the complexity of the work of preparing a new calendar for each year, Mr. Cotsworth continues: "The fact that the basis for making each year's calendar requires six years of co-operative work by the best astronomers in five leading nations, should be known to all who yearly buy or receive calendars. For example, the first calculations for the year 1933 were begun on August 17th, 1927, by eminent scientists in the Greenwich Observatory and the Nautical Almanac Office. They work out for all nations the Right Ascension and Declination of the Sun, Moon and 84 of the Fixed Stars at each of the 24 hours, for every one of the year's 365 days.

By August, 1928, these were printed and sent to the directors of the National Observatories in the United States, Germany, France and Spain, to enable each to begin his quota of the great work they mutually shared out, so that no part is duplicated. The United States astronomers work out for all Nations, the Eclipses for the Sun and Moon and the hourly positions of the planets with their satellites, etc. Germany calculates the hourly positions for 307 of the Fixed Stars below the Celestial Arctic Circle to the Tropic of Cancer. France works out the hourly positions for the Polar Stars within the Arctic Circle, etc. Spain does like work for 65 of the more Southern Stars, etc.

About one and a half years later these four National Directors having printed their results will send copies to each other and to the Greenwich authorities, who will combine them in the "Nautical Almanac" for 1933 which they will print and issue about the end of 1929. The complete Nautical Almanac will then be sent to the directors of Geodetic Offices in all Nations, to enable each of

them to work out from its data, the tide tables showing the daily times and heights of tides for each of his country's ports, ready for issue to the makers of calendars not later than January 1932, so that calendars for 1933 may be printed ready for distribution during the last months of 1932.

Flu Epidemic In East

Forty per cent. of Population Of Ontario Have Been Affected

Forty per cent. of the population of Ontario were stricken with influenza during the recent epidemic, according to figures issued at the provincial department of health, Toronto, today.

Many districts in the province had 100 per cent. of their population stricken, it was stated, while 50 per cent. of the population of Toronto had suffered from the disease.

"The number of cases is diminishing daily, but the death rate for the number of reported cases is still increasing," Dr. S. J. Bell, deputy minister of health, stated.

Dealing with the complexity of the work of preparing a new calendar for each year, Mr. Cotsworth continues: "The fact that the basis for making each year's calendar requires six years of co-operative work by the best astronomers in five leading nations, should be known to all who yearly buy or receive calendars. For example, the first calculations for the year 1933 were begun on August 17th, 1927, by eminent scientists in the Greenwich Observatory and the Nautical Almanac Office. SALVATION ARMY TROUBLE

General Bramwell Booth, supreme commander of the Salvation Army, has been asked by the high council of the Army to retire from active leadership because of ill health.

Alberta As a Grain Country

Province Growing Grain Equal to Any On The Continent

W. J. Stephen, Alberta Field Crop Commissioner, who attended the Chicago International Livestock and Grain Show, where he was in charge of the provincial exhibits, states that a very favorable impression was made by the exhibits from this province, which upheld and enhanced its reputation as a grain country. He points out that Alberta won more premium money at Chicago than any State in the Union, and more than all the other provinces in Canada combined. Of the 58 entries 32 secured prizes and the consensus of opinion by those attending the show was that Alberta is growing grain equal to any on the continent.

A Successful Immigrant

Man From Sweden Does Well With Farming Operations In Saskatchewan

Another instance of a successful immigrant launching out on an ambitious scale of farming is that of Andrew Anderson of Alaska, Sask., who came from Sweden in 1910; he began farming a homestead of 160 acres and now farms 4,500 acres which, in 1928, yielded 54,000 bushels of Marquis wheat. But the farm is something of a show place as well containing, among other things, an arboretum and an artificial lake.

Friend—I got a touch of neuralgia. Deadbeat—I wonder if he'd lend me anything!

About three-fourths of the world's silk is used in the United States.

The Dominion Fuel Board Issues Progress Report Dealing With Present Fuel Situation

The Dominion Fuel Board has issued a progress report covering the activities of the Board and the changes that the fuel situation in Canada has undergone since publication of the Board's interim report in 1923. The report contrasts conditions of five years ago, when the main fuel problem was one of supply, with those of today, and states that there is now an abundance of both native and foreign fuels for all purposes and that the major problem now is one of markets for Canadian coals.

At the time of the Board's inception a question of primary importance was to replace foreign anthracite in Central Canada by suitable alternative fuels. There had also arisen a strong national desire for a maximum of Canadian fuel independence instead of reliance on the United States for 50 per cent. of the coal used. A number of broad investigations have contributed materially to the solution of the problem of an adequate supply of fuel and in part, at least, to the solution of the other problems of national independence. Ontario and Quebec, though still using large quantities of American anthracite, are no longer entirely dependent on this fuel, the producers of which are fighting here as in their own country to retain a declining market. Coke, British anthracite, low volatile coals and fuel oil are strong competitors with American anthracite in the household fuel trade, and the range of Alberta and Maritime coals is being extended through special provisions. "The fact is emphasized, however, that the problem of Canada's complete fuel independence is still unsolved. The geographic handicap consequent on the location of our largest markets far from our great producing fields, but in close proximity to those of the United States, is one difficult to overcome.

The Board points out that it cannot assume as its function the formulation of a national fuel policy, for this is a prerogative of Government, and any such policy, so far as it concerns complete fuel independence, must be determined largely by questions of national expediency, based however upon the most complete and accurate knowledge of all technical and economic facts obtainable. The Board is endeavouring to secure and correlate these facts. The most important point still to be ascertained is the cost of transporting coal to Ontario and Quebec from Alberta and the Maritime Provinces

and the determination of this by actual test has been assigned by the Government to the Board of Railway Commissioners.

The report summarizes the results of widespread investigation in fuel utilization conducted by the Board through its members and in some cases with the assistance of eminent outside engineers. It is shown that technical research is opening up many possibilities for more efficient and diversified uses of coal. In the matter of low temperature carbonization of bituminous coals, the report points out the difficulty of applying in Canada methods now in operation in countries like Great Britain, France and Germany where the density of population provides a near and ready market for the products. The Board, however, is keeping in close touch with the development of the different processes so that advantages may be taken of them should they prove applicable to conditions in Canada.

The report closes with the statement that the necessity for the study of fuels and fuel problems will probably continue as long as coal is mined. A new fuel research laboratory now being completed for the Department of Mines is exceptionally well equipped, and through association with the Department the Fuel Board will avail itself of these improved facilities.

Experiments Interesting

Materials Tested Under Pressure

Loss Their Familiar Properties. Tremendous pressure has reversed almost completely the familiar properties of some well known substances in experiments at Harvard University.

Paraffin, under pressures ranging between 200,000 to 600,000 pounds a square inch, became so hard that Prof. Percy W. Bridgman pronounced it harder than machine steel. Rubber became so hard that it was pronounced usable as a die to form steel.

Dr. Bridgman found that steel tended to flow, if not like water, at least sufficiently to spread.

Oil became useless as a lubricant, because it turned solid. Mercury, after a pressure of 60,000 pounds began to escape, the theory being that its atoms were forced between those composing the steel chamber in which it was imprisoned.

One of the objectives of the experiment is to test the material used in manufacture of big guns. Another is to study the molecular and atomic changes in various substances.

Sodium Sulphate Deposits

The investigation of the natural sodium sulphate deposits in Western Canada by the Department of Mines, has proved tonnage of hydrous sodium and magnesium sulphate in excess of 100,000,000 tons. There are many other deposits in the Prairie Provinces, which could produce sodium sulphate, but while the markets are limited and the price low, only those close to railways can be considered as producers at present.

"My razor doesn't cut at all." "Why Henry, your beard is tougher than the kitchen linoleum."

He—"A penny for your thoughts." She—"What do you think I am—a salt machine?"

"I am so unhappy. My husband suffers from kleptomania." "I'm so sorry. Does he suffer much pain?"—"Vikings, Oslo.

Seven new stamps were issued by the post-office department and are on sale to collectors and others desiring special sets. These stamps are issued by the department to replace the old issue which is at present in use. Of the new issue the highest value is the one dollar, which is olive-green in color and depicts Canada's legislative building at Ottawa. The blue 50-cent is pink in color and depicts a harvesting scene. Next in order is the 12-cent gray, on which

is shown Quebec bridge. The next three sets issued, the eight, five and three cent stamps, show a portrait of King George, and are dark blue, purple and red, respectively. The issue has been acclaimed by collectors and others as the most beautiful set ever issued by this country and one of the best issues, as far as collections of colorful stamps are concerned, in the world. Each has a large amount of scroll work around the pictures.

CROSSFIELD, Alberta.

**Innisfail Curlers
Win Kremer Trophy**

Two strong curling teams from
Innisfail invaded Crossfield last
Friday evening to compete for the
Kremer challenge cup held by the
local club. The visitors got away to
a good start right from the begin-
ning and were never overtaken. The
rink skipped by Halliday held the
Wagner rink to a score of 9 to 4 in
nine ends, but from then the visitors
gradually increased their lead,
winning by a score of 19 6.

The Miller rink who were play-
ing Freeman of Innisfail, passed
up an opportunity of scoring a 4
and 5 end in the early start of the
game, and had it not been for a
five end scored by the visitors in
the tenth end this game would
have been very evenly contested.

Freeman won by 19-12.

The total score was as follows:

Innisfail 38 -- Crossfield 18.

Personell of rinks: Halliday skip,
Amery, Stralo and Pierce.

Wagner skip, Kremer, Lundy
and Oyler.

Miller skip, McLees, Winning
and Waldoek.

Freeman skip, Kirkham, White,
and Willis.

**ATTENDING CARSTAIRS
BONSPILL**

Four local curling rinks are at-
tending the Carstairs bonspiel this
week. The rinks are as follows:—

G. Williams skip, Amery 3rd,

McLees 2nd, Cruickshank lead.

McFadyen skip, McRory 3rd, E.

Meyers 2nd, N. Johnson lead.

F. Purvis skip, C. Purvis 3rd, B.

Stralo 2nd, J. McCool lead.

H. Maskell skip, KacKay 3rd,

Russell 2nd, A. Hall lead.

G. Williams defeated Foster, of
Carstairs in the Citizens event by
a score of 15 to 6, in Thursday
morning's draw.

J. L. McRory defeated G. Stewart
of Carstairs, in the Citizens' event
Thursday morning.

Enjoyable Evening

Mrs. T. Green entertained three
tables of five hundred on Wednes-
day evening. The guests were—
Mrs. Baker, Mrs. Behar, Mrs.
Reeves, Mrs. Spivey, Mrs. White-
field, Mrs. Fugue, Mrs. McFadyen,
Mrs. Cruickshank, Mrs. McEchern,
Miss M. A. Gazeley, Miss Georgie
Campbell, Miss Duncan.

The first prize was won by Mrs.
Reeves and the Booby went to Mrs.
McEchern. A dainty lunch was
served by the hostess and thorough-
ly enjoyed by all.

The Things They Say

The man who is maintaining an
up-to-date hotel these days is not
only doing a good stroke of busi-
ness but is performing a public
service as well. A town is no finer
than its hotel and is often judged
by the hotel accommodation pro-
vided for the travelling public, as
also the restaurant accommodation
provided. Travelling men and
tourists are the best press agents
any town ever had. They are go-
ing from place to place and since
hotels and restaurants are essential
to their comfort, they naturally
consider hoteleries as an import-
ant item in any towns make-up.
When the hotel does not suit them
his opinion of hotel and town is
expressed in words that bite like
acid. The Crossfield hotel is al-
right, as good as one will find in
the Province for a town this size
or considerable larger. Courteous
treatment is extended to every
guest by the proprietors, Mr. and
Mrs. Cruickshank. The dining
room and lunch counter in con-
nection is also an up-to-date enter-
prise worthy of support.

Hart-Parr Tractor**School Interesting**

Hart-Parr Instruction School
which was held in the U.F.A. Hall
on Tuesday last, was well attended
in spite of the bad condition of the
roads. The school commenced at
eleven o'clock with lantern slides
which illustrated the history of
Hart-Parr tractor from the first
one built in 1899 to the present
date, after lunch illustrations were
given on the screen of the different
parts of the tractor, and which
were explained by Mr. Smith the
representative of the Hart-Parr Co.
who ably conducted the school,
and was ably assisted by Mr. Clifton
The school lasted till 5:30 in the
evening and everyone appeared
well pleased with the short course
tractor instruction school.

The local dealers Tredaway &
Springtime are to be congratulated
on procuring the course for this
district.

Municipal Notes

At the annual meeting of the
Municipal District of Rosebud No
280, held last Saturday in the U.
F. A. hall, the following council-
lors were elected:—

For district No. 3, Geo. Murdock
by acclamation.

For district No. 6, W. Edmond-
son by acclamation.

For district No. 1, Thos. How-
den and H. T. Stewart were nomi-
nated to fill the position of coun-
cillor. The election will take
place Saturday.

Show and Dance

Monday, February 25th

Don't Miss the Nigger Show 1
In the U.F.A. Hall, on Monday
next, at 8:15 p.m.

Bubber Carson the noted Comed-
ian and Monologist.

Don Morton Eccentric Roller
Dancer and Comedian.

J. Nelson Anderson Bass Soloist
with fame in Europe and America.

Miss Irene Cochran Contralto—
Eight years Soloist with Deadens
40 piece band.

Leon Donaldson Pianist, — A
graduate of two white Musical
Conservatories.

Dance after show.
